Department of Computer Science and Engineering
CS2309 – Java Lab

Exercise 6a:

1. Study about the various I/O Stream classes and their methods.
2. Study about Serialization.

Exercise 6b:

Design classes for Currency, Rupee, and Dollar. Write a program that randomly generates Rupee and Dollar objects and write them into a file using object serialization. Write another program to read that file, convert to Rupee if it reads a Dollar, while leave the value as it is if it reads a Rupee.
