## Class myDateProg

- java.lang.Object

- - myDateProg

- 

```
public class myDateProg
extends java.lang.Object
```

class representing date functionalities

Author:  
v.vaishnavi

- - **Constructor Summary**

Constructors

**Constructor and Description**

[myDateProg\(\)](#)

- - **Method Summary**

Methods

**Modifier and  
Type**

**Method and Description**

	<a href="#">checkAndCompare</a> (int ch)
static void	Static method representing the equals(),before(),after() and compareTo() functionalities of Date class
static void	<a href="#">main</a> (java.lang.String[] a) Main method
static void	<a href="#">subMenu</a> (int choice, mypackage.myDatee d)

static void

Static method representing the Get and Set functions present in Date class

- **Methods inherited from class java.lang.Object**

clone, equals, finalize, getClass, hashCode, notify, notifyAll, toString, wait, wait, wait

- - **Constructor Detail**

- **myDateProg**

```
public myDateProg()
```

- **Method Detail**

- **subMenu**

```
public static void subMenu(int choice,  
                           mypackage.myDatee d)
```

Static method representing the Get and Set functions present in Date class

Parameters:

choice - - GET/SET choice

d - - object of class myDate

- **checkAndCompare**

```
public static void checkAndCompare(int ch)
```

Static method representing the equals(),before(),after() and compareTo() functionalities of Date class

Parameters:

ch - - equals/before/after/compareTo choice made

#### ■ **main**

```
public static void main(java.lang.String[] a)
```

Main method

Parameters:

args - of type string
